

PRACTICUM BLOG WEEK 12

TEACHER IMAN

**MONDAY
16 OCT 2023**

SCHOOL ASSEMBLY

For today's assembly, the school had a session for appointing out the new school prefects for the afternoon session. These prefects will be the leaders and will be setting an example for every students in school. The principal mentioned over 200 students applied for the school prefect but they chose the top 50 students for form 1 and form 2.

CLASSES

For my class today, I continued discussing and checking the answers for the previous lesson with the students on last Thursday which was about writing an email on giving advices. Some of the students are getting there, some are still confused with the format of email and short message which means that I need to focus more on these students for the next writing exercise in class.

**TUESDAY & WEDNESDAY
17 & 18 OCT 2023**

TUESDAY CLASSES

Today, I had normal classes with my art class and I am still teaching them about interior design. Today, I asked them to draw a floor plan based on how they want their house to be. Some students have very good drawings and was able to understand how to draw a floor plan.

WEDNESDAY CLASSES

For today's classes, I taught the students about violence. As we know about the issue that is going on in the world right now about the war between Palestine and Israel so it is important to educate students to be aware of the current issue.

MEET THE GKMP

On wednesday, I went to the Anggerik room to collect my lesson plan but turns out cikgu Muhammad forgot to sign it so I went to his office next door and have him sign the lesson plan. While I was waiting for him to complete signing the file, Puan Ili assigned me to attend the SPM perkampungan Ilmu for documentation in 2 weeks time. She asked me if I could attend as it is happening on a saturday morning and I told her that I was able to come. She asked for the practical teachers to help the morning teachers for their help on documenting the programme soon and compiling them into one document.

SEPAK TAKRAW MEETING

7TH MEETING SEPAK TAKRAW IN CO-CURRICULUM

Same as the previous sepak takraw meeting, the takraw ball could not be found. This time I was on duty with Madam Mardiana and we came up with any possible ideas to let the students play for their co-curriculum. However, our last choice was to let them play football with the football team as they were not able to play sepak takraw. So we guided them in the field and watched them play football instead. After the activity, Madam Mardiana invited me to have lunch with her at the school canteen and we had a chit chat about our school days. She also gave me many tips on being a practical teacher in school. She teaches French subject so sometimes she teaches me a few French language when we have a conversation.

THURSDAY

19 OCTOBER
2023

MEETING WITH THE SCHOOL PRINCIPAL

Today I am having my second observation with my supervisor, Madam Nurfarizatul. She came to SMK Taman Melawati from the morning to observe all three of us (me, Hannah and Najwa). After she was done observing Hannah, we came to the principal office to meet with him. We have told Sir Jagdave earlier that our supervisor will be coming to school today so he can be prepared. It took quite some time to be able to meet him as there were many teachers and parents coming in to see him as well during the time we decided. I missed my first class with 2 AlJazari but I told my mentor already she said it was okay.

SECOND CLASS OBSERVATION WITH SUPERVISOR

Finally, it's the day of my observation with my supervisor, Madam Nurfarizatul. After the meeting with the school principal, she observed Najwa first then I guided her to my classroom at 2 AlKindi. I have informed the students earlier about this observation so they can be prepared to clean the class greet Madam once she enters the class with the hope they will behave well today as it is one of my classes who is quite hard to handle at some times. Unexpectedly, they did quite amazing because I was not expecting them to be responsive much. Maybe it's because I had candies for students who respond and try to answer my questions! For this observation, I used mahjong paper and projector as well and I taught them about tag questions and how to construct them in a sentence using positive statement and negative tag questions as well as the other way around (negative statement and positive tag questions). After asking them to complete few sentences during the lesson delivery, I introduced them the class activity. They are familiar with the activity for circulating the mahjong paper because I have done it with them before during the first observation with my mentor. Sadly, Madam was unable to stay until the end of the lesson, but she was able to give me the feedback for my lesson. I was very happy to hear that she loved my lesson! she also pointed out things that I am missing out in my lesson, which I will try to improve next time for my last observation.

FRIDAY

20 OCTOBER 2023

ACADEMIC INTERACTION DAY

Today, the school is having an Academic Interaction Day. Its like a report card day where students will come to school with their parents and take their report card.

MENTORING 2 ALKINDI

As for the academic and interaction day, I was in charge of my own class, 2 AlKindi as their mentor along with Cikgu Aziriani who is their main class teacher. The programme starts at 3pm so before 3pm, students will go and have their break first. As there were many parents, me and Cikgu Aziriani took the chance to talk to one of their parents each to save up time. I had the chance to talk to their parents about their child's result and well being in class. I received few questions from them where I was not able to answer so I asked Cikgu Aziriani to help me answer for them. She informed me earlier to not expose myself as a practical teacher just incase.

**THAT'S ALL FOR
WEEK 12!!**

SWOT Analysis

STRENGTHS

- Able to conduct the lesson in time within the class hours.
- Able to explain the rules of grammar correctly to the students.
- Able to talk to parents about their child's result and wellbeing in class.

WEAKNESSES

I should have explained more in my lesson and improve my tone and voice volume in class. Especially when it is heavy rain season now, students are not able to hear me clearly.

OPPORTUNITIES

- Students can strengthen their communicating skill through teamwork.
- Students are able to improve themselves in their lesson and classes after getting the feedback during the Academic and Interaction Day.

THREATS

My laptop still lagging most of the time when I use it for my lesson, seems like I have to prepare tabs open much more earlier so save up more time.
